Infection can be eliminated if good hygiene during delivery is practiced. JANMA is a Clean Birth Kit by ayzh. The World Health Organization recommended the “Six Cleans” – six simple steps to prevent infection during childbirth. This disposable delivery kit enables healthcare providers to provide the six cleans, giving women and newborns a healthy, happy, infection-free start to life.

VALUE ADD OF JANMA:
- Allows for a safe, hygienic birth environment regardless of the facility conditions
- 1 kit for 1 birth saves time and resources for birth preparation and sterilization
- Brings comfort to mothers, knowing freshly packed supplies are used only for her
- Versatile sales and distribution channels ensure kit is present at “point of care” to improve access and service delivery

BASIC KIT

<table>
<thead>
<tr>

ayzh believes that every woman deserves a safe and clean delivery at a low cost and strives to create interventions to reduce infection rates, and enhance the delivery experience for mothers, newborns, and the team caring for them.

ayzh™ – Clean Birth Kit

a product of ayzh™

Simple, low cost, high quality birth kit for use in hospitals and other health facility settings.

CONTEXT

Infection is a leading cause of death and disability for both mothers and newborns. Each year, about 3 million newborns die within the first month of life. Infection accounts for over ⅓ of these deaths. Infection is also a leading cause of the 300,000 maternal deaths each year*. Infection often occurs during or after childbirth when sterile supplies are not available at the right place and right time.

WHY KITS?

Kits are a convenient and cost effective solution. They simplify procurement, increase efficiency around delivery, empower health-care providers, and act as a catalyst for behavior change.

AVAILABILITY

Kits are available for distribution worldwide and can be ordered from:
