

GRILLO PRESENTATION

GLOBAL INNOVATION

September 2017

THE PROBLEM EARTHQUAKES

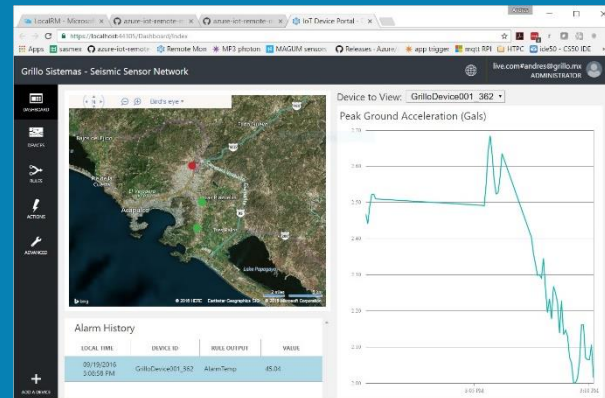

- Every year 13,000 deaths and \$24B economic damages are caused by earthquakes.
- In 2010, the number of deaths rose to 320,120
- 1,737 earthquakes in Mexico every year
- 35 countries have suffered historic >1000 fatalities with single event
- Population at risk from earthquake = 240,000,000

OUR SOLUTION AFFORDABLE EARLY WARNING SYSTEM

- Grillo has developed the most affordable and rapidly deployable alert
- Cutting edge IOT and big data with grillo sensors, processing, notifications.
- Sensors cost less than 1% of a typical seismograph
- Offer up to 2 minutes warning before earthquake

ACHIEVEMENTS MÉXICO

- Sensor installation from Chiapas to Michoacán
- Generating alerts faster than very expensive government system
- Offering intensity and countdown info to users
